## CINTEC LTD.

WANDLE WAY, MITCHAM  
SURREY CR4 4NB ENGLAND  
TEL: 01-640 2241 TELEX: 946177  
CABLES: CINEROMA MITCHAM

Designed to function under the most arduous conditions of terrain and climate, the CINEROMA is one of the most efficient and effective means of communicating Information. It is fully equipped as a self-contained Cinema for operation in the open air, after dark, and is capable of presenting films to an audience of up to 3,000 people at each performance. Built to a tropical specification and used by Government departments, Health and Agricultural organizations, throughout the world. A range of equipment optional extras is available which greatly enhances the versatility of the unit. Electrical power for operation of the equipment is provided by an alternator, driven from the centre power take-off of the vehicle engine. The closely regulated supply of 3,000 watts at 230 volts 50 Hz., is maintained by an engine speed governor. Overheating, while generating, is prevented by oil cooling equipment fitted to the engine, which is complementary to the normal water cooling system. The re-entrant loudspeakers can be fitted to the roof for making public announcements while travelling. Although the unit may be operated by one man, seating is provided for three, while sufficient space is available for personal luggage, display materials, etc.

## **SPECIFICATION LR109/16**

### **VEHICLE:**

Land-Rover 109" Station Wagon,  
2.25 litre petrol engine  
Engine speed governor.  
Extra 10 gallon petrol tank with c/o cock.  
Laminated windscreen glass.  
Centre power take-off.  
Automatic accelerator stop. (while generating).  
Interference suppressors.  
Alloy platform on roof.  
3 kVA alternator beneath passenger seat.  
Control panel fitted to dash  
Power wiring in flexible conduit.  
Flotation mounted, dustproofed cabinet, for  
stowage of equipment.  
Built-in cable drum.  
Stowage for ancillary equipment.

### **EQUIPMENT:**

16mm Projector OPT/MAG with zoom lens and  
accessories.
